Madera North	5/8/23	2310005	10	6	4

From scheduling storage space to inventory to accounts receivable, the portal is your single point of reference for all things Amond World.

SIMPLE

The portal has been designed from the ground up to make every step of the process painless and informative

ALL INCLUSIVE

User options for notifications on items like scheduling e-mails upon shipment or receipt of product is configurable by customer, by user to allow maximum flexibility.

SECURE ACCESS

Your privacy and confidentiality are of the utmost importance to us. All data is encrypted between your web browser and the Amond World server infrastructure.

RESERVATIONS

Storing inventory at Amond World is as easy as submitting a reservation request through the portal. Users can select the delivery date range and length of storage required for their product to allow Amond World to properly schedule and reserve the applicable storage space for your product. Once approved, the system is ready to receive product and store product at whatever level of detail is requested.

INVENTORY

From the moment inventory is received at the facility, you'll have real-time access to inventory available in storage. Inventory is tracked at the same level of detail as provided by the customer in the original reservation—this means different types of product can be tracked at either very generic (i.e. Almonds – Aldrich) or very detailed levels (down to the style of pack, brand, grower and field for the product).

Current Inventory

Warehouse: All
Commodity: All

Customer	Warehouse	Product	QTY
A New Customer	Madera West	2023 Bin Almonds NP - Raw Bulk	5
A New Customer	Madera North	2023 Bin Almonds NP - Raw Bulk	5

SHIPPING & DISPATCH

Shipping product back out of the Amond World facility is as easy as scheduling dispatches in advance. A dispatch can be put in for any active inventory based upon product type, again matching the exact characteristics specified by the customer during the reservation process.

Dispatches can be planned as far in advance of shipment as is desired.

The screenshot shows a web application interface for scheduling a dispatch. It is divided into two main sections: 'Dispatching Detail' on the left and 'Dispatch Detail' on the right. The 'Dispatching Detail' section includes fields for 'Customer' (with a dropdown for 'A New Customer'), 'Bill to Customer', 'Salesway' (with a dropdown), and 'Requested Ship Date' (with a date input field showing '05/15/2023' and a blue 'PL' button). The 'Dispatch Detail' section includes 'Commodity' (dropdown with 'Almonds'), 'Variety' (dropdown with 'Aldrich'), 'Product Type' (dropdown with 'Select an Item...'), 'Crop Year' (input field with '2022'), 'Grower' (dropdown with 'Select an Item...'), 'Lot' (dropdown with 'Select an Item...'), and a checkbox for 'Organic?'. There are also 'X' buttons to clear the dropdown selections.

CUSTOMIZATION

Customizing things like communication preferences can all be set from the customer portal. Customers can choose to receive things like immediate copies of signed bills of lading or summary reports of bins received on inbound shipments.

ACCOUNTS RECEIVABLE

Invoices from Amond World are delivered electronically and support the use of ACH payments. All invoices and statements are available live on the portal and can easily be paid directly after logging in to the portal.

REPORTING

Live reporting on the portal allows users to view specific historical reports such as daily receipts of product, current inventory, shipments by date or upcoming shipments/dispatches. These reports can be viewed online or exported to PDF/Excel. Reports can also be scheduled to automatically arrive in your inbox daily/weekly/monthly at a time of the user's choosing.
